Talk Into Your Telephone

SOMETIME ago, while a business man was telephoning, a friend in his office heard him say to the person at the other end of the wire: "I don't hear you clearly. Are your lips close to the transmitter? Ah! That is much better. I hear you perfectly now."

When the telephone talk ended he turned to his friend and said: "Some people forget that they can't get the best results when telephoning unless they speak DIRECTLY INTO the transmitter."

Did it ever occur to you that you might not be using your telephone the right way? Do you speak sideways, speak above, speak below, speak six inches away from the mouthpiece of your telephone, or do you speak directly into the transmitter?
